

## **A MESSAGE TO REFUGEES RESETTLED IN NAURU**

We the youth of Republic of Nauru inform refugees and bring forward some key issues created because of this resettlement programme by the Government of Australia and our corrupt Government.

Among lots of problems we have in our community because of this resettlement program the one big highlighted problem we can see is that Refugees are taking over all our job opportunities and spreading over our small congested community, making our lives miserable as we can see clearly in near future refugees will be the leading and ruling people and will make local community people their slaves, and this is what we cannot see and tolerate that Australia Government headache (refugees) making our lives crashing and bringing down to the ground. So we warn all the refugees working around in different sectors to quit the jobs and stay back of our community and also stop walking around in the island.

Second big and very important issue is that Nauru is a conservative country, it is not a multicultural country so resettling refugees means that inducing different culture from different countries and we think that we are never been ready for that but the mistake and wrong decision of few corrupt people from Nauru Government putting the lives, culture, customs, values of Nauru local people in danger. Our women, girls and teenagers are interested in refugees because of their skin, colour, face and handsomeness. Our wives, sisters and daughters are in contact with refugees and having affairs with them and we can never see our women having fun with refugees and neglecting locals.

So we warn Refugees to Go Away of our country and just to hell with all your concerns if not, get ready for the bad things happening and waiting ahead.

We warn our Corrupt Government as well as Australian Government to take away your rubbish (refugees) and leave our country, otherwise there can be worse situation for refugees as you can see these days. Our group network is working and keeps watching on all the activities of the refugees.

We Appeal our youth and locals to get united and join us in this mission and face the reality as we can see some big problems that might put our country, our people, our children, our culture in danger.

**YOUTH OF REPUBLIC OF NAURU**
